

**2025 MONKEY FREE**

**AND**

**ANIMAL WELFARE**

# PART 1

## MONKEY FREE DUE DILIGENCE AUDIT

A multi-dimensional approach to verifying supply chain integrity through the BV Monkey-Free Coconut Due Diligence Audit protocol.

## Element 1 : Plantation Management

Ensuring every farm in the supply chain is formally validated and mapped.

- **GIS Mapping:** Verification of plot boundaries and coordinates.
- **Registration:** Formal validation of farm ownership and production history.
- **Traceability:** Linking every coconut batch to a specific, registered plot.

## Element 2 : Supplier Capacity

Analyzing supplier production volume against farm capacity to prevent "mixing".

- **Yield Analysis:** Validating that reported volumes match historical farm yields.
- **Conformity:** Assessing a supplier's ability to maintain monkey-free standards at scale.
- **Inventory Control:** Robust records for incoming/outgoing raw materials.

## Element 3: Harvesting Methods

Documenting the elimination of animal labor through technological and human alternatives.

- **Manual Tools:** Verification of telescopic poles and climbing gear.
- **Manpower:** Assessing harvesting teams for sufficient human capacity.

## Element 4: Stakeholder Consultation

Cross-verifying farm practices through local community engagement.

- **Interviews:** Engaging villagers, neighbors, and the community

# Phase 1 : Low Risk Area Results

## Central Thailand: Ratchaburi & Samut Songkram

**Schedule:** Mar 4 (Office Audit) | May 6-9 (Farm Audit).

**Scope:** Coconut farm 330 Plots in Ratchaburi and  
Samut Songkram

**Area:** 1,353.69 Rai. (1.2216.59 Ha)

 **STATUS: AUDIT PASSED**

*Bureau Veritas Certification (Thailand) Ltd.*

*Thai Coconut Public Company Limited.*

**BUREAU  
VERITAS**

# Phase 2 : Medium Risk Area Results

## Prachuap Khiri Khan

A critical production hub requiring intensive field validation.

**Schedule:** Jul 31 (Office Audit) | Aug 19-22 (Farm Audit).

**Scope:** Coconut farm 227 Plots in Prachuap  
Khiri Khan

**Area:** 3059.95 Rai (489.59 Ha)

 **STATUS: AUDIT PASSED**

# Phase 3: High Risk Area Results

---

## Southern Thailand: Nakhon Si Thammarat

Geographical regions traditionally associated with animal labor were subjected to the highest level of scrutiny.

**Schedule:** Sep 15 (Office Audit) | Oct 8-10 (Farm Audit).

**Scope:** Coconut farm 49 Plots in Nakhon Si  
Thammarat

**Area:** 3.1557.75 Rai (89.24 Ha)

 **STATUS: AUDIT PASSED**

### Audit Success Milestone

**Result:** **Zero** non-compliance issues identified across 49 plots (557 Rai). Verification confirms that even in traditionally high-risk zones, modern manual methods are fully integrated.

# 2025: 2025 Comprehensive Audit Summary

Risk Category	Audited Plots	Total Area (Rai)	Compliance Status
Low Risk	330 Plots	1,353.69	PASSED
Medium Risk	227 Plots	3,059.95	PASSED
High Risk	49 Plots	557.75	PASSED
<b>GRAND TOTAL</b>	606 Plots	4,971.39	100% MONKEY-FREE

Conclusion: All raw materials for Thai Coconut PLC are verified monkey-free as of Year-End 2025.

# PART 2

## WELFARE & CSR

BEYOND AUDITING—BUILDING A SUSTAINABLE ECOSYSTEM FOR ANIMAL WELFARE THROUGH STRATEGIC PARTNERSHIPS WITH THE WILDLIFE FRIENDS FOUNDATION THAILAND (WFFT).

# JOINT INITIATIVE FOR MONKEY WELFARE

## MOU Signed: March 27, 2025

A landmark strategic partnership between the **Thai Coconut Industry Group** and **Wildlife Friends Foundation Thailand (WFFT)**.

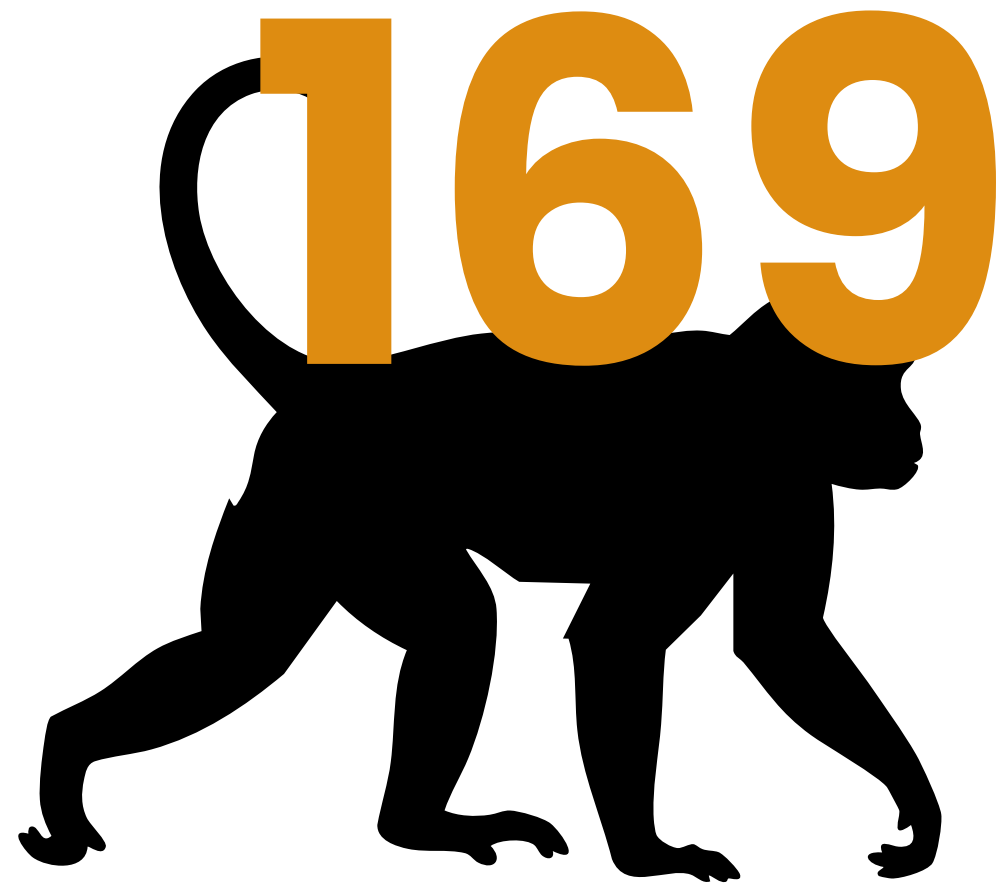

"We are dedicated to aligning the Thai coconut industry with international animal welfare standards for a sustainable and ethical future."

- **Ethical Sourcing:** Eradicating cruelty across the entire supply chain.
- **Global Compliance:** Meeting international trade and welfare benchmarks.
- **Social Responsibility:** Promoting humane practices and supporting farmers.

# CSR & SANCTUARY PROGRESS

---

**Retired Monkeys Identified**

## WFFT Project Milestones

- ✓ **Facility Development:** Established a new sanctuary with natural enclosures and a wildlife hospital.
- ✓ **Rescue Operations:** Successfully assisted 12 additional monkeys in 2025.
- ✓ **Data Collection:** Mapped 63 households to track former labor animals.

# 2026 STRATEGIC ROADMAP

---

## Scale & Expansion

Expanding sanctuary areas and enhancing hospital capabilities.

## Research

Conducting in-depth welfare data collection for long-term planning.

## Policy

Continued advocacy for sustainable national agricultural policies.

## Sustainability

Providing sustainable alternatives to ensure economic stability.

# Leading with Compassion

*"Leading the industry through ethics, transparency, and compassion."*

Thai Coconut Public Company Limited  
remains committed to a cruelty-free supply chain and the long-term welfare of Thailand's wildlife.
